ACADEMIC CV | October 2026

Profile & proposed research interests

Developer and Master of Information Technology student at Monash University exploring PhD opportunities. Proposed interests include human-computer interaction, local-first privacy, understandable encryption and recovery, and accessible navigation cues. These directions grow from independent software projects; no completed research degree or publication record is claimed.

Education

Master of Information Technology — Monash University, Melbourne
March 2025–expected 2026. Completion date to be confirmed.

Bachelor of Computer Applications — ABBS College, India
Completed August 2023.

Selected technical and research-related projects

Scintilla / CueLock — Accessible map-cue verification
A semantic verifier for navigation cues on web maps. Supports route and marker editing, GeoJSON import, simulated colour-vision modes, encoding suggestions and report exports. A research instrument; no completed participant evaluation or WCAG certification is claimed.
scintilla.world/cuelock/ | github.com/neervasa00000000/scintilla-world

PhotoMind — Local-first photo organisation
Built a Rust/Tauri desktop application with React, TypeScript and SQLite. Exact and visual duplicate review, technical quality analysis, possible same-person groups and recoverable photo cleanup run on the device.
github.com/neervasa00000000/PhotoMind

ARKIVE — Experimental encrypted personal vault
Browser-side AES-256-GCM encryption, wallet-based key wrapping and recovery, Arweave storage and Base indexing. Public Base Sepolia testnet prototype; not production-ready.
github.com/neervasa00000000/ARKIVE

Publications

No publications listed in the source CV. Software projects and proposed research directions are presented separately from peer-reviewed research.

Professional experience

Founder, Full-Stack Developer & SEO Specialist — NutriThrive
Melbourne | March 2025–present
Designed, coded and deployed the store as sole developer. Own site architecture, technical SEO and ongoing product work for Australian customers.
nutrithrive.com.au

Collaboration Manager — Lacoste NFT Project
March 2022–April 2023
Community partnerships and operations; grew Discord from 0 to 52,000 members, as reported in the source CV.

Marketing Manager — Web3 projects
Bugatti NFT Project: October–November 2022.
Memphis Depay NFT Project: May–August 2022; Discord growth from 0 to 11,000 members in about one month, as reported in the source CV.
Board Gamers NFT Project: March–June 2021; roadmap and white-paper work, community collaborations.

Leadership & service

Student Leader, MegaHost & Volunteer — Monash University
March 2025–present
Selected to organise and host 2026 Orientation for 300+ incoming students. Managed Breakfast Club operations serving close to 200 members per session across a recurring five-day schedule, as reported in the source CV.

Additional software

SynapseSave: published Chrome extension for snoozing tabs and restoring groups on schedule.
ASIN: published Chrome extension for collecting Amazon product identifiers and CSV export.
Gas Guardian: open-source multi-chain gas-fee dashboard.
Last Return / Still Open: independent interface and interaction studies.

Technical skills

TypeScript, JavaScript, Python, Java, Rust, Solidity; React, Tauri, Vite, Tailwind; SQLite/SQLx, SHA-256, perceptual hashing; Web Crypto/AES-256-GCM, wallet recovery; Git/GitHub, technical SEO and UI/UX prototyping.

Document basis

Prepared from the September 2026 CV and project documentation verified during portfolio preparation. Research questions on the portfolio are proposed directions. Degree completion, referees and publication details should be updated as applicable.
